

Hej, my name is Christopher I am twenty years old and I currently live in Neukirchen-Vluyn, a little town in the west of Germany. I finished school this summer and tried to live abroad for some time which at the end took me to this very interesting project in Brønderslev, Denmark.

Normally my spare time is filled with creative and communicative stuff like playing volleyball or badminton, participating in political projects and "making" music or photography. Nowadays due to the Corona-Virus my focus is on taking and publishing photographs.

In my opinion the project from the Brønderslev Ungdomsskole perfectly fits to my hobbies and my idea of what education should deliver. I want to be part of the goal to help young people in discovering and using their full potential with expressing their creativity.

My intention by joining this project is to help other people finding their strengths and competences but also to develop myself (and my language skills). Furthermore I am extremely interested in getting to know more about the Danish culture and to discover Denmark's beautiful landscape. I already did a road trip to Skagen where I was able to get a small impression of what Denmark looks like which definitely also influenced my decision to go for this project. I do not want to be a tourist anymore, I wish to experience my neighbour country as a citizen!

Being an ESC volunteer in Brønderslev Ungdomsskole would mean for me: experiencing diversity, friendship, teamwork, pure creativity (Especially when I look at the other volunteers) and in general open minded people.

I can't wait to meet all the new people and challenges and I am sure in six months everyone will have learned a lot!

Hej alle sammen,

I am Freya, 18 years old and from Germany. I am looking forward to joining the Ungdomskollen in the beginning of next year, January 2021. In my hometown Leipzig, the biggest city in East Germany after Berlin, I like to spend a lot of time outside with my friends, go climbing and riding the bike.

One of my biggest hobbies takes place in the kitchen: baking. I love to prepare cookies, French patisserie and just yummy cakes.

In the past I started learning Chinese, the culture and life have fascinated me for a long time and finally, I had the chance to visit China last autumn in a cultural exchange.

In my free time I either work as a waitress, which is not possible at the moment, or as a volunteer at a foodbank where I am hand out food donated by supermarkets to people in need.

I hope we will all have a great time together at the club - with lots of fun and excitement. In the past, I worked as a tutor as well, maybe we can find some time to learn a little German (and in my case of course Danish) together. It will be a pleasure for me to get to know the Danish way of life, develop my language skills and myself in general as well. It will be a great experience to work as a volunteer at the Club. After I had finished this summer I knew for sure that I want to spend some time abroad before starting my studies at a university. I am so glad that I can participate in the project, learn Danish and experience the way of living in this unique country. Together with the kids and teens, I am planning to do several special activities like a theme week, cook together and become creative.

From vacation, I already had quite an idea of what Denmark is about and made the plan to search for a chance to live there for a while. Now I got this chance due to the European Solidarity Corps and the Ungdomskollen. Working as a volunteer - developing with each other and learning more about the country next to us - is a life changing opportunity. Let's rock it together!

Hej I am Adrian, I am 18 years old and live in Germany near Dortmund. I graduated from high school this year and always had the plan to go abroad after school.

I applied for the project in Denmark because I have never been to Denmark before and I think that Scandinavia is very exciting. I also wanted to work with children and young people and bring my musical and sports hobbies into the project.

I play trombone and bass and play badminton and football. I really like making music together with my two siblings. I hope I can lead similar musical projects there. I also like filming and photographing, so I plan to document a lot of my stay!

I would like to learn Danish, improve my English and exchange experiences in general. I am looking forward to the mutual cultural exchange and I think we will all benefit from it!

My name is Stella Batzella, I am 18 years old and I am from the west of Germany. This year I finished school and decided that I want to live abroad before studying.

During this time, I want to get to know new people and friends, gain new language skills and of course be part of a social project. I want to contribute with my strengths to help people finding their way and to develop myself, too.

Living abroad was always a dream for me and now having the opportunity is incredible.

I chose Denmark because although it is my neighboring country, I don't know that much about it. I did a lot of research and was pretty fascinated about the friendly, truthful and modern impression that people obtain by living in Denmark. I am curious and wanted to experience this culture not as a tourist, but as a member of society. The ESC volunteer project strongly appeals to me because of the work-diversity and its goals. Everyone has his own role

and nevertheless complement each other. I like working in Teams and tackling new challenges.

My hobby and passion is music. I love to sing and also play instruments, for example the guitar. I look forward to start music-projects and share music with other colleagues, students and friends.

Furthermore, I like drawing and dancing. I plan to extend my creativity even more and help people to find theirs, too.

Seems like it is going to be a great time!
